

Workflow Diagnostic

One workflow. A clear current-state view. A practical next step.

Provider	Heutrix Pty Ltd ACN / ABN: _____
Client legal name	_____ _____
Client ABN / ACN	_____ _____
Workflow in scope	_____ _____
Fee	AUD 950 plus GST, if GST is lawfully payable
Order date	_____ _____
CSA	Heutrix Client Services Agreement v1.0, dated 1 August 2026

Contract: This signed Order Form and the identified Client Services Agreement form the contract. The Client confirms it received the complete CSA before signing.

1. Outcome

Heutrix will review one defined operational workflow, map how it operates now, identify material friction and visibility gaps, and recommend the simplest practical improvement options. The Diagnostic is intended to support an informed next-step decision; it is not an implementation project or assurance review.

2. Included Services

- A short kickoff and data-handling check with the Client project owner.
- One remote structured discovery workshop of up to 90 minutes with up to four Client participants.
- Review of up to five relevant documents or 50 pages in total, using redacted, de-identified or synthetic material unless separately approved.
- A current-state workflow map showing key steps, roles, information, decisions, handovers and material failure points.
- A practical future-state workflow map at an appropriate level of detail.
- A prioritised list of improvement opportunities and high-level implementation options, which may include process changes, tracking, visibility, automation, controlled AI or no technology change.
- One remote findings presentation of up to 60 minutes.

- A concise written findings report summarising scope, evidence, assumptions, observations, recommendations, dependencies and next steps.

3. Exclusions

- System configuration, software development, automation build, dashboard build, data migration, integration, production deployment or ongoing support.
- Clinical, medical, legal, tax, employment, regulatory, official audit, NDIS registration, compliance assurance, mock audit or certification advice.
- Detailed security testing, penetration testing, privacy impact assessment, clinical safety assessment or formal accessibility audit.
- Travel, on-site workshops, translation, transcription, extensive document review or consultation outside the stated limits.
- Use of identifiable patient, participant, worker or staff information, unless added through a signed change and data authorisation.

4. Deliverables and acceptance

Deliverable	Acceptance criteria	Target
Current-state map	Covers agreed start/end, material roles, handovers, decisions and known pain points.	Draft with report
Future-state map	Shows recommended ownership, controls and material changes at a practical level.	Draft with report
Opportunity list	Prioritised with rationale, dependencies and a high-level option for each material item.	Draft with report
Findings report	Addresses the agreed workflow and distinguishes evidence, assumptions and recommendations.	Within 10 business days of inputs
Presentation	Walkthrough completed and material Client questions recorded.	Within 5 business days of draft

The Client has five business days to accept the draft or give specific reasons it does not meet these criteria. One consolidated reasonable correction round is included. New scope or preference changes require a Change Request.

5. Client inputs and assumptions

- The Client appoints one project owner who consolidates feedback and has authority to confirm operational facts.
- The workflow is sufficiently narrow to cover in one workshop and starts and ends at the points recorded below.
- The Client provides agreed documents and participant availability within five business days after payment.
- Work is remote and conducted during Melbourne business hours unless agreed otherwise.

- The Diagnostic relies on information supplied by the Client and is not an independent audit or verification of compliance.

Workflow start	_____
Workflow end	_____
Client project owner	_____
Workshop attendees	_____
Documents to review	_____

6. Timing

Payment due	Before commencement, following a valid invoice
Target workshop date	_____
Inputs due	_____
Target draft date	10 business days after payment and receipt of agreed inputs
Target presentation	_____

Dates move reasonably if Client dependencies are late. Heutrix will notify the Client of the revised target and minimise avoidable delay.

7. Fees and payment

Fixed fee: AUD 950 plus GST if Heutrix is registered or required to be registered for GST. The fee is invoiced in advance and due within seven calendar days. Work begins after cleared payment and receipt of required inputs.

The fixed fee covers only the Included Services and one correction round. Extra work proceeds only under a signed Change Request. Approved travel or third-party costs are not included and cannot be incurred without written Client approval.

8. Data, system and AI settings

Default data class: No Personal Information or sensitive information. Use synthetic, de-identified or appropriately redacted material only.

Approved repository	Client-controlled Google Workspace / SharePoint / other: _____
----------------------------	---

Production system access	Not approved
Personal or health information	Not approved
Local download	Not approved unless required for an approved redacted document
AI use	No Client Confidential Information or Client Data in AI. Public/general research only unless a signed AI approval is attached.
Retention	Return/delete project Client Data within 30 days after acceptance, subject to lawful retention and backup cycle

9. Intellectual property

The Client-owned Deliverable model in the CSA applies: on full payment, the Client owns the project-specific maps and report, excluding Heutrix Background Materials and third-party materials. The Client receives the embedded licence described in the CSA.

10. Special Conditions

If blank, no Special Conditions apply.
